About Us

Founded in 2011 as a supplier of industrial kitchen equipment in Erbil city North Iraq, CLASSDECOR is now serving in a factory that produces on a 1000 m² indoor area which is equipped with the latest technology. And showrooms in Erbil and Sulaymaniyah cities 500m² for each, CLASSDECOR is a strong industrial pioneer that breaks grounds in industrial kitchen sector. The quick steps we took for becoming a national brand helped us to succeed this in a short-term, as well as spread Iraq's prestige in industrial kitchen sector to all around the country. As a result, CLASSDECOR has a suppling and production volume that includes 19 cities now, which makes us one of the known industrial enterprises in Iraq.

Classdecor provides design, production and service support of all processes from the project design, to installation over thousand product groups such as storing, preparing, cooking, handling and service equipment in the field of industrial kitchen sector including hotel, restaurant, cafe, patisserie, hospital, schools, construction sites, camps and factories. Notably devices and products which are provided by Classdecor, are certified by international certification centers by making their tests both in the scope of the company and in laboratories from external sources. It has certificated for more than 2000 products and product groups which shall be valid in national and export markets about sales of those products to international market. Some of those certificates are; CE , SGS . Classdecor, also hold ISO 9001 Quality System Certificate.

Our Certificates

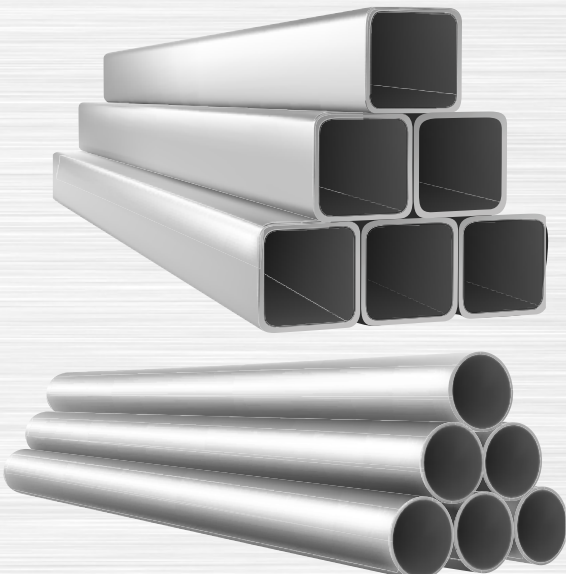

STAINLESS STEEL CHARACTERISTICS

Stainless steel is the name of a family of iron-based alloys known for their corrosion and heat resistance. One of the main characteristics of stainless steel is its minimum chromium content of 10.5%, which gives it its superior resistance to corrosion in comparison to other types of steels. Like other steels, stainless steel is composed primarily from iron and carbon, but with the addition of several other alloying elements, the most prominent being chromium. Other common alloys found in stainless steel are nickel, magnesium, molybdenum, and nitrogen.

THE ADVANTAGES OF STAINLESS STEEL

Stainless steel is still the most widely used material in the design of equipment for professionals in hotels and the catering industry and, more generally, in all food processing activities, particularly in the professional catering sector. Indeed, its various characteristics give it considerable advantages: durability, solidity, easy cleaning.
